PRANAMS,

We are into Manufacturing & Marketing of Organic Fertilizers like Panchagavya & Organic Pesticides like Agnihastra & Organic Manures like Ganajeevamrutha. We are committed to Enhance Customer Satisfaction By Supplying Quality Products on Time, Through Continual Improvement of Processes in the Organization."

We are producing panchagavya using only Indian Breed of Naati Cows.

Our Breeds are Kangrej, Vechur, Ongole, Malenadu Gidda, Sahiwal, Gir and Ombalacheri.

We are using the sale proceeds towards the development of Goshala and as a service we are doing this. The purchase also helps us in running Goshala.

Panchagavya produced by Indian Breeds gives better results compared to panchagavya produced by Non Indian Breeds.

1. Organic Fertilizer Panchagavya :-

Panchagavya can be used for any crop and even kitchen gardens. Apply the mixture with water every alternative Sundays. For Agriculture purposes the usage is as under :-

- 1st application - 15 days from germination/harvest.
- 2nd application - Flowering stage.
- 3rd application - Pod maturation/flower changing to Fruit / Vegetable. Approximately 7 to 10 ltrs. of Panchagavya is required per acre. Applying using power spray is economical.

2. Organic Pesticide Agnihastra :-

Agnihastra acts as a pesticide, insecticide and fungicide.

The 2% mixture with water has to be applied once in four days when require. It has to be applied either early morning or late evening. Approximately 7 to 10 ltrs is required per acre and spraying by power spray is economical.

3. Organic Manure Ganajeevamrutha :-

Ganajeevamrutha is a soil enricher, and it improves the fertility and richness of the soil. Soil is the mother of the plant, once the mother is healthy then the child will also be healthy. Ganajeevamrutha has to be applied after ploughing the land, before sowing. It should be applied on wet soil.

Per crop one application is enough. Approximately 20 to 25 Kilos of Ganajeevamrutha is required per acre. It has to be spread to the soil by hands.
